Running Unit Tests Automatically

Thomas Claudius Huber
Software Developer

@thomasclaudiush | www.thomasclaudiushuber.com

Module Outline

Run tests with the .NET CLI

Push code to a repository on GitHub

Run tests automatically with a GitHub action

- Trigger the tests with another commit

Run tests with the .NET CLI

Push the code to a repository on GitHub

Run tests automatically with a GitHub action

Trigger tests with another commit

Summary

Run tests with the .NET CLI

- dotnet test

Push code to a repository on GitHub

Run tests automatically with a GitHub action

Congratulations

Course Summary

Implement unit tests

- Arrange, act, assert
- Decouple dependencies

Apply Test Driven Development (TDD)

- Red, green, refactor

Run unit tests with a GitHub action

Thank You
